

PRODUCT PROFILE

Uncle Earl's® Hand Healing Soap™

Developed for machinists, whose hands get dry and even cracked from frequent washing, then exposed to metalworking chemistry and biology, where they become further irritated.

Uncle Earl's is made the old-fashioned way, using only natural ingredients (that everyone can pronounce) to remove dirt and grime without abrasives, which further damage the skin.

Its powerful moisturizers than absorb into the skin to heal and protect, alleviating skin irritation.

Skeptical? Then put it to the test.

Right away you can feel a difference in the lather, and even the way your skin feels after the first wash. Keeping the lotion layer on your skin after washing uses even less water, although it takes about a minute for the lotion to be fully absorbed.
