Zebra® Coolant Treatment Accessories

Oxygenator™

- Extend coolant life
- Eliminate foul odors
- Maintain high oxygen levels
- Industrial-grade bronze air diffusers
- Fuel-grade tubing
- One year warranty

In the absence of oxygen, anaerobes multiply, causing coolant to spoil. Oxygen in the coolant system inhibits anaerobic bacterial growth, extending coolant life. For large sumps or tanks, a circulation pump may be needed. Like a pond, coolant will stay healthier longer if it circulates or is aerated. Whenever your machine pump is off, utilize an Oxygenator or circulation pump to extend the life of your coolant.

Circulation Pumps

- Coolant lasts longer with continuous circulation
- Ideal for sumps over 100 gallons
- Low cost for an economical solution
- Small size makes them convenient for most sumps
- Includes liquid transfer hose and magnet
- One year warranty

Odor Control Tablets

- Eliminates sump odors caused by hydrogen sulfide bacterial emissions
- Easiest and most effective way to control sump odor and correct low pH
- Contains no formaldehyde or harmful chemicals
- Safer and more economical than biocides
- Works best when used with Oxygenator or circulation pump
