SUMP LEVEL REGULATOR (SLR) TO MAINTAIN TANK FLUID LEVELS.

Cleveland, OH---Zebra Skimmers Corporation, a full-line manufacturer of oil skimmers and coolant maintenance equipment, recently introduced its Sump Level Regulator (SLR) to maintain tank fluid levels.

"Given the costs of labor in this economic climate, it is important to decrease the amount of time spent on maintenance and redirect it to productive tasks. We find it important to develop cost-saving equipment to reduce labor as well as material expenses. The Sump Level Regulator will do so by activating the customer's water supply or fluid pump to maintain the correct fluid operating level in each machine tool sump or central tank, thereby limiting time otherwise spent by the operator," comments Meg Grant, Sales & Service Manager.

The Zebra® Sump Level Regulator Features:

- Heavy duty, mechanical components with only two moving parts
- Simple, two-step installation process
- Can be used for all fluid types
- When coupled with the Zebra Fill-Station™, it creates an automated fluid on demand system

Zebra Skimmers, the leader in coolant maintenance for over a decade, invents new technology to save its customers money on coolant while reducing waste, and sells and supports its equipment worldwide. Most products are guaranteed for at least a year, and some for life.
