## **Zebra Skimmers Introduces Customized Options for Muscle™ Coalescer**

Cleveland, OH -- Zebra Skimmers Corporation, a full-line manufacturer of oil skimmers and coolant maintenance equipment, recently introduced customized options for its Muscle Coalescer Series. The Muscle Coalescer separates tramp oil from individual metalworking fluid sumps to prevent bacterial rancidity and extend coolant life.

According to Meg Grant, Inside Sales & Service, "Not all coolant sumps are made the same, and each may need something a little different from the last. We now offer solutions for these individual sump needs as well as for customers who wish to utilize the Muscle on various sumps."

Customizable options include:

- Selection of body type to meet needs of coolant type
- Selection of filter bag micron size (on filter bag models)
- Selection of appropriate intake attachment for each application
- Additional lengths for intake and clean coolant return hoses
- Air and electric diaphragm pump upgrades available for multiple machine use

Zebra Skimmers, the leader in coolant maintenance for over a decade, invents new technology to save its customers money on coolant while reducing waste, and sells and supports its equipment worldwide. Most products are guaranteed for at least a year, and some for life.
